#### Communication

Allscoreswerebetween 72.8% and 79.2%, indicating that LMHA is a talevel near the 76% score needed to eliminate the need for the follow -upplan. The total score was 75%.

LMHAwillstriveforbettercommunicationwithitstenants, particularlyintheareaofresponsiveness to concerns and questions. The Public Housing staffing is small, and occasions occur where staff may both be at the developments and not available in the office. LMHA management will attempt to coordinate activities so that, as much as possible, one person will be generally available at any one time. However, in addition to be ing physically available, LMHA ill seek to improve responsiveness by encouraging prompt response to voice mail, written correspondence and other communications. More effort will also be made to solve potential problems before they be come identified as a concern.

Theotherportionof the communication score is a 72.8% for being supportive of the resident/tenant organization. LMHA has never been approached by any resident stoform are sident organization, and management must work to generate participation in the Resident Advisory Board. LMHA will promote its willing ness to work with resident swilling to form are sident organization.

#### Safety

LMHAresidentsscoredatotalof72% on thesafety indicator. LMHA's lowests coring was 52.4% for being a ware of crime prevention programs. This may be a factor of poor communication, since LMHA participates in the Paines ville Crime Free program and puts on a "safety social" once a year where law enforcement discuss crime prevention and safety. Additionally, LMHA pays for additional police patrols to specifically patrol Wood lawn Homes as a means of bolstering security.

The second lowest score was 65.8% for the belief resident screening contributes to crime in the developments. LMHA has since widely increase dits scope of resident screening, and will be communicating this to residents.

Theremaining two areas of lows cores were safety in the home/unit and in the building. For the unit issues, LMHA will examined oor locks and others a fety factors to determine what areas area vailable for improvement. For building issues, LMHA has changed entrys ecurity for the two senior/disabled building to less enthelikelihood of unauthorized persons entering the buildings. However, these security systems also dependon residents following instruction and recommended procedures such as not permitting unknown persons into their building.
