## **Deconcentration Policy**

It is the policy of the Quitman Housing Authority (QHA) to attempt to house families in a manner that will prevent a concentration of lower income families and/or concentration of higher income families in any one development. The specific objective of the QHA is to attempt to house no less than 40% of its QHA inventory with families that have incomes at or below 30% of the area median income by public housing development. Also, the QHA will attempt to ensure that no individual development has a concentration of higher income families.

The QHA staff will take the following actions, as part of the Authority's overall efforts, in its attempts in obtaining the stated goals of the deconcentration policy.

- A. At the beginning of each fiscal year, a review of the resident's income shall be conducted to determine how many households have income that is at least 30% below the area median income. This review shall establish a baseline which shall indicate the income range of families required to assist in meeting the policy objectives.
  
- B. After the baseline is established, a goal for new admissions shall be set to attempt to ensure that 40% of the housing inventory is being or will be used by families whose income is at or below 30% of the area median income.
