### Attachment A

It is Allentown Housing Authority's policy to provide for deconcentration of poverty and encourage income mixing by bringing higher income families into lower income developments and lower income families into higher income developments. Toward this end we will skip families on the waiting list to reach other families with a lower or higher income. We will accomplish this in a uniform and non-discriminating manner.

The Allentown Housing Authority will affirmatively market our housing to all eligible income groups. Lower income families will not be steered toward lower income developments and higher income families will not be steered toward higher income developments.

Prior to the beginning of each fiscal year, we will analyze the income levels of families residing in each development, the income levels of census tracts in which those developments are located, and the income levels of families on the waiting list. Based on this analysis, we will determine the level of marketing strategies and deconcentration incentives to implement.

### DECONCENTRATION INCENTIVES

The Allentown Housing Authority may offer one or more incentives to encourage applicant families whose income classification would help to meet the deconcentration goals of a particular development.

Various incentives may be used at different times, or under different conditions, but will always be provided in a consistent and nondiscriminatory manner.
