The identification of housing needs must address issues of affordability, supply, quality, accessibility, size of units, and location. <i>Very Low & Extremely Low-Income Household Needs (Earning Less Than 50% of the Area Median)</i> <i>It is estimated that a total of 14,664 households or 31 percent of all households in Pike County are comprised of low to extremely low income persons (earning less than 50% of the area median income) with housing problems of some sort. Of the 70 extremely low-income renter households that comprise the waiting list, 3.5% are elderly (over the age of 62), 26 % are small households (2-4 persons), and 73 percent are single member households.</i> <i>By FY 2014, it is estimated that an additional 750 low-income owner and renter households will have problems, representing an increase of 15% over FY2010 levels and suggesting an annual addition of approximately 300 households. A more accurate indicator of housing distress is derived from households with problems and those that are severely cost burdened with paying more than 50% of their income for housing including their utilities.</i></p>

As funds become available, additional manpower and hours will be added.</i></p>
