## ADMISSIONS POLICY FOR DECONCENTRATION

The THA's admission policy is designed to provide for deconcentration of poverty and income-mixing by bringing higher income tenants into its lower income project.

Gross annual income is used for income limits at admission and for income-mixing purposes.

Skipping of a family on the waiting list specifically to reach another family with a lower or higher income is not to be considered an adverse action to the family. Such skipping will be uniformly applied until the target threshold is met.

The PHA will use gathered tenant income information in its assessment of its public housing development to determine the appropriate designation to be assigned to the project for the purpose of assisting the PHA in its deconcentration goals.

### **Deconcentration and Income-Mixing Goals**

The THA's income-mixing goal is a long range goal and may not be achieved in the first year of implementation due to its low annual turnover of units. Specific quotas will not be set.

The THA will strive to achieve the following goals for deconcentration of poverty and income-mixing:

Since the Tiverton Housing for the Elderly is presently all "extremely low-income families, then the goal is to increase the number of higher income families by at least 40% at or above the low-income limit (80% of area median) into the lower income development.

### **Project Designation Methodology**

The THA will determine and compare tenant incomes at the development. Upon analyzing its findings the THA will apply policies and measures listed to bring higher income families into this lower income development.

The THA's goal is to have eligible families with higher incomes occupy dwelling units in projects predominantly occupied by eligible families having lower incomes. THA has no development which is occupied by predominately higher incomes.

When selecting applicant families for a designated project, the THA will determine whether the selection of the family will contribute to the THA's deconcentration goals. Skipping of families for deconcentration purposes will be applied uniformly to all families. The THA will not select families for a particular project if the selection will have a negative effect on the THA's deconcentration goals. However, since there are sufficient families on the waiting list, no unit will remain vacant longer than necessary.
